DATA SCIENCE COMPETITION EVALUATION CRITERIA:

We have focused on assigning scores on each process of the Data science pipeline instead of mere predictions. The competition was aimed to judge students on their data science skills instead of the skill of **fitting different models**.

The criterion for judgment is as follows:

1) Data Pre-Processing   ~ 10%
2) Feature Extraction   ~ 20 %
3) Feature Selection   ~ 10 %
4) Model Selection   ~ 10 %
5) Insights from Visualization (If any)   ~5-10%
6) Root Mean square Percentage error. ~ 50%
